UNIFORM CONSTRUCTION CODE (UCC) PERMIT APPLICATION INSTRUCTIONS

Please **complete** application provided.

- One (1) sets of plans are required to be submitted with the completed application and supplement information.
 - Plans must be sealed and signed by a design professional. **Additional plans may be requested based on the scope of the project.

Plan requirements must confirm to UCC codes. Site plans (if applicable) must show building footprint and distances from lot lines, street rights-of-way and finished grades. Must submit manufacture specifications of all appliances.

The fees associated with the application are listed on the attached Fee Schedule. We will contact you with the amount of the fees due upon receipt of the plans and applications. No permits will be issued prior to receipt of all fees. If the work performed varies from the applications and/or plans or construction is started prior to issuance of permits, additional fees may be required, no Occupancy Permit will be issued until all fees have been paid in full. All fees are non-refundable.

The issuances of UCC Construction Permits do not individually authorize the start of construction until all other required permits are approved and obtained.

PLEASE NOTE THE FOLLOWING:

- Non-residential construction may require Land Development Plan approval prior to approval of UCC Permit.
- 2. Obtain E&S Approval, when required from the County Conservation Districts.
 - When is an Erosion and Sediment Control (E&SC) Plan needed?
- As per the Chapter 102 Erosion and Sedimentation Control Regulations, development of an erosion and sediment control plan is required for all earth disturbances of 5,000 square feet or greater, earth disturbances in High Quality of Exceptional Value watershed, or if other DEP permits require it. This would also include timber harvesting activities, which must submit a timber harvest E&SC plan.
- Projects having less than 5,000 square feet of earth disturbance are still required to develop, implement, and maintain erosion and sediment control best management practices (BMPs). They are only exempt from having a written plan. Additionally, persons proposing timber harvesting activities or road maintenance that disturb twentyfive (25) or more acres must apply for an Erosion and Sediment Control Permit.

- Projects that disturb 1 acre or more require a National Pollutant Discharge Elimination System (NPDES) permit for Stormwater Discharges Associated with Construction Activities. As part of this permit, an approved E&SC plan is required.
- 3. Obtain a Public Sewage Permit or-On-lot Sewage Disposal Permit
- 4. Obtain a Driveway Permit from Township/Borough and/or PennDOT
- 5. Obtain an approved Zoning permit from Township/Borough/County.
- 6. The Zoning and/or UCC Permit shall expire within six months if the permitted work has not begun or after two (2) years if the work has not been completed.
- 7. Additional permit requests may be required as part of the proposed construction activities and issuance of other permits required by the township/borough.
- 8. The Building Code Official will make compliance inspections during the construction process to determine compliance with all permits and ordinances. **Right of entry for inspection of the improvements is a condition attached to all permits issued.**
- If compliance is confirmed by inspection, a Use and Occupancy Certificate shall be issued. It is unlawful to use and/or occupy any structure, building, and/or land or portion thereof without this certificate.
- 10. Failure to present true and correct information on any or all applications may result in the revocation of all permits.
- 11. Incomplete or missing application information and/or incomplete plan submissions will delay permit processing.
- 12. Once the permit is approved, the approved information will be **forwarded via email** unless specified otherwise. The issued permit must be posted in a conspicuous place on the premises.

ALL APPLICATIONS AND FEES CAN BE FORWARDED TO:

Lehigh Engineering, LLC P.O. Box 1200 200 Mahantongo St. Pottsville, PA 17901

If you have any questions regarding the UCC Construction Applications, please contact us at 570-628-2300 or lehigh@lehighengineer.com.
